DATE MAILED: 03/17/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/609,413	Applicant(s) ISHIZAKA ET AL.	
	Examiner Rodney H. Bonck	Art Unit 3681	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 February 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,2,4,6-11,14 and 16-23 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 1,2,4 and 6-10 is/are allowed.
- 6) ☒ Claim(s) 11,14 and 16-22 is/are rejected.
- 7) ☒ Claim(s) 23 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
- ☒ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

The following action is in response to the amendment received January 13, 2006 and the Request for Continued Examination filed February 16, 2006.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11, 14, and 16-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 11, the intended meaning of "a clutch weight under a centrifugal force" is unclear. It is questioned whether this should be --a clutch weight which inclines under a centrifugal force --, as in claim 1.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein

were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim 22 is rejected under 35 U.S.C. 103(a) as being unpatentable over St. John('320) in view of Peterson('555). St. John discloses a centrifugal clutch comprising a clutch weight 33 having a plurality of weight component members 70 (Figs. 11-13), which are stacked and fixed to each other. Each of the weight component members 70 has a first part and a second part, wherein first part (holes 78) has a smaller specific gravity than the second part. Regarding claim 11, St. John discloses a centrifugal clutch wherein the clutch weight is formed of members 70 with portions differing in specific gravity. St. John does not appear to disclose making the weights of sintered metallic powder as called for in these claims, but making centrifugal clutches from sintered metal is well known, as acknowledged by applicants in the instant specification. St. John does disclose altering the weight plates to achieve differing engagement characteristics of the clutch. Peterson discloses pivotal centrifugal weights 40, 56 for use in a variable pulley and provides means to vary the mass and moment of inertia of the weights. The weight components in Peterson are made of sintered metal and can include portions at 52-55 of larger specific gravity to vary the position of the center of gravity of the weight member. Material can be charged or fitted in holes 52-55 to add

this material. The weight components can be formed of members 64, 65, 66 stacked together (Fig. 9), the members having different shapes. It would have been obvious to carry this teaching to the centrifugal clutch of St. John, the motivation being to provide a means to vary the engagement characteristics of the clutch.

Allowable Subject Matter

Claim 23 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 11, 14, and 16-21 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 1, 2, 4, and 6-10 are allowed.

Response to Amendment

The amendment received January 13, 2006 overcomes the rejection of claims 1, 2, 4, 11, and 14 under 35 USC 103(a). The rejection is withdrawn.

After reconsideration, a new rejection of claims 11, 14, and 16-21 under 35 USC 112, second paragraph, has been added.

Applicants' arguments with respect to new claim 22 have been considered, but are not persuasive. Claim 22 is essentially the same scope as claim 1 prior to the amendment. The rejection under 35 USC 103(a) based on St. John in view of Peterson

Art Unit: 3681

that was applied against claim 1 now applies to claim 22. The rejection is believed proper for the reasons set forth on pages 4-5 of the Office action mailed October 17, 2005.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hans et al.(DE 27 17 611 A1) is cited for its showing of a laminated clutch weight (Figs. 3 and 4). Yokoyama et al.(JP 2003-287061 A) shows a clutch weight comprising five weight components.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rodney H. Bonck whose telephone number is (571) 272-7089. The examiner can normally be reached on Monday-Friday 7:00AM - 3:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles A. Marmor can be reached on (571) 272-7095. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
